Meets or Exceeds Most Building Code Requirements

Excellent Thermal & Acoustic Properties

Seals Against Air Infiltration

High-Speed Installation Technology

Pre-Expanded Foam - Won’t Damage CMU Walls

Exceptional Thermal Performance

Class A (Class 1) Fire Rated Per ASTM E-84

Costs Less to Install than Rigid Foam Insulation Board

Installed by Factory Trained, Experienced Personnel

Improves STC Ratings

Core Foam Masonry Foam Insulation is for new block wall construction only; Not for use in retrofit or stud wall applications.

Core Foam Masonry Foam Insulation is a “dry” resin foam-in-place insulation product designed for the cores of concrete masonry units in new construction. It is competitively priced and is equal to or superior to all current foam-in-place products on the market today.

Core Foam Masonry Foam Insulation is a Class 1/Class A fire-rated product and meets or exceeds all testing requirements of current building standards.

R-Value per inch:
- 5.0/inch @ 25°F mean temperature
- 4.6/inch @ 75°F mean temperature

R-Value of 8” CMU Wall:
- 8.0-10.0 Injected into 100 lbs./ft³ block

R-Value of 12” CMU Wall:
- 11.0-13.0 Injected into 100 lbs./ft³ block

Flame Spread:
- 0-25 per ASTM E-84 @ 3.5” thick

Smoke Density:
- 0-450 per ASTM E-84 @ 3.5” thick

Fire Classification:
- Class A per NFPA Life Safety Code

This numerical flame spread rating is not intended to reflect hazards presented by this or any other material under actual fire conditions.

Thermal performance is portrayed to reflect typical installed conditions based upon NAVLAP accredited laboratory testing per ASTM C518 as well as industry accepted engineering calculations. Core Foam Masonry Foam Insulation typically is installed at densities ranging from 0.4 to 1.2 lbs./ft³; the above data is based upon ASTM C518 testing at 0.72 lbs./ft³ by R & D Services, Inc., Cookeville, TN. Thermal performance claims are based upon average density and conditions.

Core Foam Masonry Foam Insulation can also be used in new residential applications such as concrete-block stucco walls, foundations, and basement walls.

Core Foam Masonry Foam Insulation is typically used in new commercial and institutional buildings such as . . .
