

Turnkey Single-Gun Rig*

- 1 8x18 enclosed cargo trailer (10,000 GVW Axles) with rear double doors and one side door
- 2 110-gallon cone-shaped resin/foaming catalyst polyethylene holding tanks
- 1 7.5 kw Gas Generator
120/240 volt, 7500 watts, 11500 surge watts @ 120 VAC electric start
- 1 Industrial Grade Wanner Pump Set
1 hp electric motor with pressure gauges and shut off valves - Quick disconnects for two guns with stainless steel piping
- 1 4 hp gas-powered 2" mixing pump
Approximate flow rate of 11,000 gph capable of handling solids up to 1/2" - Recoil start with silicon carbide seals
- 1 Cone-bottom plastic hopper with stand for mixing resin
- 1 300-foot hose set with brass quick disconnects
- 1 Hose Rack
- 1 Water meter with automatic shutoff to ensure consistent mixing of material
- 2 Automatic electric tank heaters with digital temperature controls
- 1 Air compressor, gas-powered, recoil start with approximate output of 11.8 cfm @ 90 psi
- 1 Standard or high-volume foam gun
- 1 Tankless Water Heater
- 1 Set digital, patent pending flow meters to ensure accuracy of chemical ratio
- 1 Scale with boxes for measuring foam quality
- 2 Days of training
- 2 Drumsets Product
- 1 Hammerdrill or 1/2" Standard Drill
- 3 100-foot extension cords

Total Investment - \$27,900

Turnkey Double-Gun Rig*

- 1 8x18 enclosed cargo trailer (10,000 GVW Axles) with rear double doors and one side door
- 2 315-gallon rectangular resin/foaming catalyst polyethylene tanks
- 1 7.5 kw Gas Generator
120/240 volt, 7500 watts, 11500 surge watts @ 120 VAC electric start
- 1 Industrial Grade Wanner Pump Set
1 hp electric motor with pressure gauges and shut off valves - Quick disconnects for two guns with stainless steel piping
- 1 4 hp gas-powered 2" mixing pump
Approximate flow rate of 11,000 gph capable of handling solids up to 1/2" - Recoil start with silicon carbide seals
- 1 Cone-bottom plastic hopper with stand for mixing resin
- 2 300-foot hose sets with brass quick disconnects
- 2 Hose Racks
- 1 Water meter with automatic shutoff to ensure consistent mixing of material
- 2 Automatic electric tank heaters with digital temperature controls
- 1 Air compressor, gas-powered, electric start with approximate output of 25 cfm @ 175 psi
- 2 Foam guns - 1 standard & 1 high volume production
- 1 Tankless Water Heater
- 2 Set digital, patent pending flow meters to ensure accuracy of chemical ratio
- 1 Scale with boxes for measuring foam quality
- 2 Days of training
- 2 Drumsets Product
- 1 Hammerdrill or 1/2" Standard Drill
- 3 100-foot extension cords

Total Investment - \$29,900
